2. Quick dials
3. Dialpad, call anybody in the hotel
4. No need to use (expensive) mobile calls

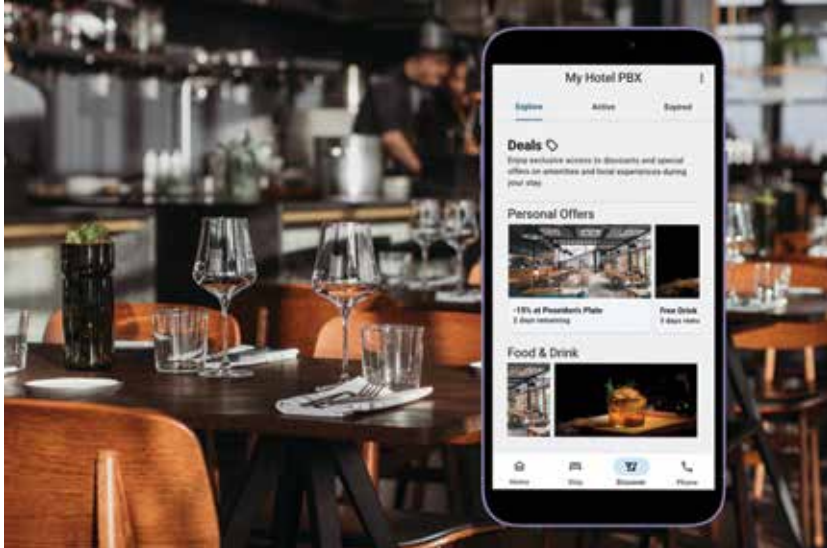

Communications

1. Internal phone calls between all staff members
2. Messages
3. Forms to enter information
4. Time tracking ("Ergani" included)
5. To-do-lists
6. Secure the inputs by checking-SSID- QR Code (changing!)- Daily work schedule

- **Cloud PBX:** Seamless internal and external hotel communication; compatible with various SIP trunk providers.
- **Smartphone App:** Can be used wherever the mobile phone has internet access.
- **Battery and Data Saving:** We cache data locally and use push notifications to minimize battery drain.
- **Time Tracking:** Track staff hours via smartphone app, RFID card, or face recognition.
- **Messaging:** Stay connected with efficient internal communication.
- **AI Integration:** Utilize chat and voice interfaces for eAssistants and eOrdering.
- **Chat Functionality:** Facilitate real-time communication with guests.
- **Deals & Vouchers:** Enhance revenue through local partnerships (with commissions!).
- **eOrdering:** Convenient web-based ordering for external guests.
- **Accommodation Info:** Access the hotel directory, wine list, and more.
- **Web Phone Connection:** Utilize WebRTC for direct phone connections on your website.
- **QR Codes & NFC Tags:** Easy access to information and services.
- **Microsite:** Create a tailored experience for your guests.
- **Customer Feedback:** Manage customer complaints, conduct surveys, and handle internal tickets efficiently.
- **Auto-Configuration:** Quick setup with plug-and-play for Flyingvoice IP phones.
